NEW GIBRALTAR CROSSCUT IS CLOSE TO BIG VEIN

Operations at the New Gibraltar Mining company in the Gibraltar district seven miles north of Round Mountain, are progressing in a pleasing manner but owing to the hardness of the rock encountered in tunnel No. 3, which is a crosscut, progress has not been fast. However, striations of quartz are showing, and it is evident that the big veins will shortly be reached, and the parties interested are watching developments with great interest. It is generally believed that the prospect will be found to be profitable at the increased depth. In this vein being sunk from tunnel No. 2, an excellent showing of galena containing good values in silver and gold is in evidence.
